Representation

## Product Insulating glass unit Designation 66.4+16+FL 12 Ar

Overall dimension (w x h) 1,230 mm × 1,480 mm

Construction 12 LSG / 16 / 12

Gas filling Argon

Area related
weight 61.4 kg/m²

Specials

Instructions for use

16

12 LSG

This test report serves to demonstrate the airborne sound insulation of a building component.

12

Applicable for Germany R<sub>w</sub> corresponds to R<sub>w,P</sub> for DIN 4109 Annex 1 Table 40

Weighted sound reduction index  $R_w$ 

Spectrum adaptation terms C and  $C_{tr}$ 

 $R_{\rm w}\left(C;\,C_{\rm tr}\right)$  = 41 (-1;-4) dB

## Validity

The data and results given relate solely to the tested and described specimen.

Testing the sound insulation does not allow any statement to be made on any further characteristics of the present construction regarding performance and quality.

ift Rosenheim 19.06.2015

tions and Guidance

The **ift** Guidance Sheet "Conditions and Guidance for the Use of **ift** Test Documents" applies.

The cover sheet can be used as an abstract.
